**NO FAULT SAFETY SURFACE**  
**WATER SATURATION MAINTENANCE GUIDELINES**

1. No Fault Safety Surface Water Saturation System must have positive drainage without standing water at any time.
2. For maximum results avoid chemical treatments such as Ozone or Bromine. In addition, avoid chlorine levels higher than 3ppm
3. Foreign and excessive chemicals in the water will result in color fading, color bleeding and/or color chalking.
4. No Fault recommends a water treatment system that is regulated and maintained daily.
5. A water treatment system where the water is recycled causing increased chemical content is not recommended.
6. The use of a potable water system is highly recommended.
7. No Fault will offer a one (1) year warranty on water play areas that follow these guidelines.

**With proper care and regular maintenance, your No Fault Safety Surface Water Saturation System for water applications is expected to last 8 or more years.**

**Failure to read and follow instructions explicitly will result in damage to the surface and termination of the No Fault Safety Surface warranty.**
