- Easy Installation for Community Build Projects
- UV Resistant
- Freeze/Thaw Resistant

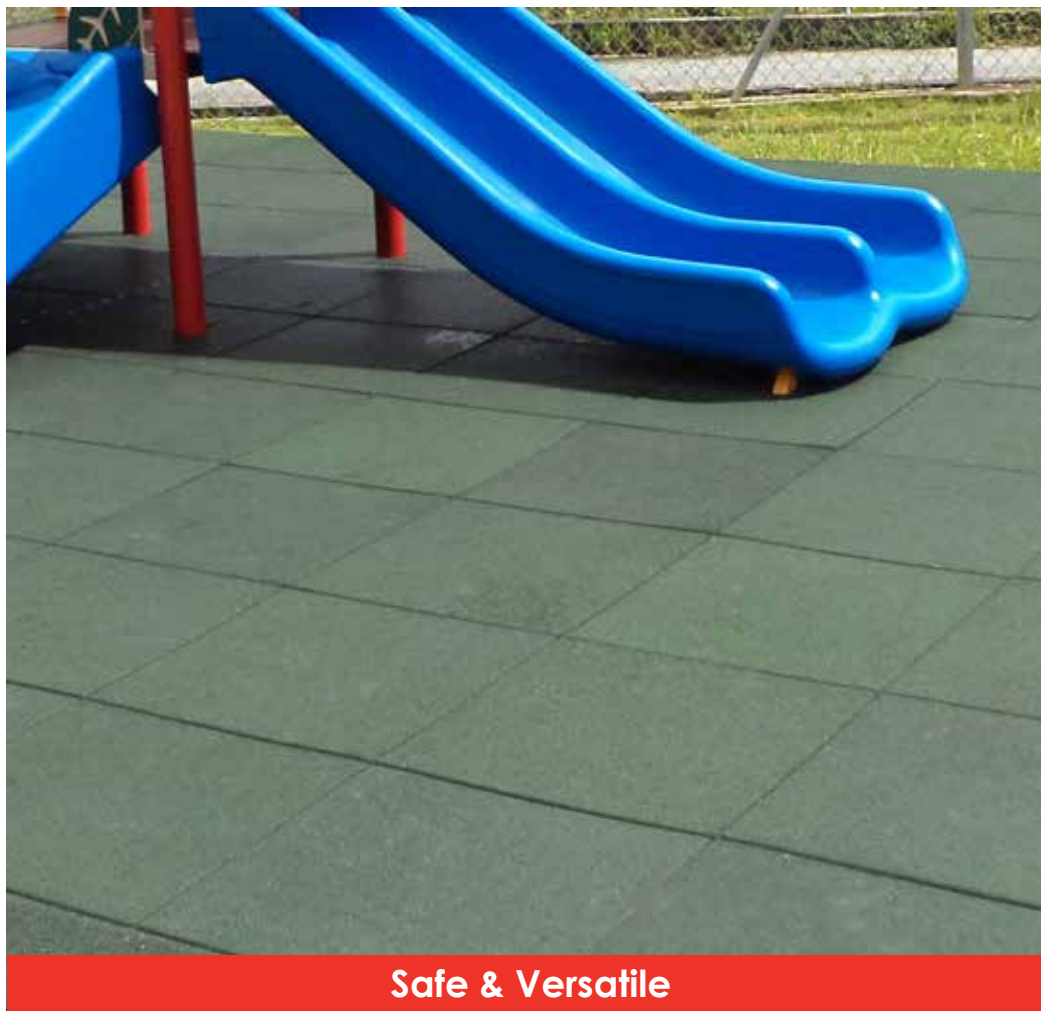

Added Values

- Superior Customer Service
- Made in USA
- Manufacturer Warranty
- IPEMA Certified
- ASTM, CPSC and LEED Compliant
- ADA Accessible
- Environmentally Sustainable

No Fault Safety Tiles

No Fault Safety Tiles are manufactured in the USA utilizing 100% environmentally sustainable recycled rubber. Our tiles are engineered exclusively to reduce the risk of serious injury associated with falls from playground equipment and other elevated surfaces. The dense recycled rubber composition enables easy maintenance and provides a clean, safe alternative to loose products such as wood mulch, sand, or pea gravel.

No Fault Safety Tiles are available in four traditional pigmented colors. All tiles have matching components for transitions, corners, and ADA accessibility. No Fault Safety Tiles are an excellent choice for new or renovated playgrounds offering easy installation, low maintenance, and superior performance.

Safe & Versatile

Durable & Accessible

Applications

- Playgrounds
- Roof Top Play Areas
- Patios & Courtyards
- Athletic & Recreational Spaces
- Indoor Playgrounds, Malls & Fitness Centers

- Call for critical fall height thickness
